

rent.a.mammut

A good sense of security

Payment transactions and cash management. With rent.a.mammut, mammut soft computing ag offers payment transactions and cash management from the cloud. Our solution is "engineered by" Swisscom (Schweiz) AG and is offered to our customers as a rental model. This well proven software combined with Swisscom's experience in operating high available cloud-solutions, guarantees you an all-round carefree package.

rent.a.mammut

rent.a.mammut as a rental solution offers you the following advantages:

- You are always up to date regarding ISO20022 specifications.
- You will profit from the two-factor authentication of financial institutions that support this security standard.
- You have a good feeling because our solution is securely operated by Swisscom's certified experts.
- The rental model causes lower long-term costs than an in-house solution
- The solution offers you independence in terms of workstations, devices and locations
- Excellent performance thanks to the use of the latest technologies (Cloud)

rent.a.mammut the suitable program

rent.a.mammut knows the country- and bank- related specifications of the ISO20022 implementation for payment transactions and cash management. If necessary our application converts the data from your ERP system to bank-compatible standards. This ensures your connection to all financial institutions in the SEPA zone. With rent.a.mammut you are also on the safe side during the eventful transition phase from old formats to new ISO20022 standards.

Supported ISO20022 Version

Using this QR code you can check the currently supported ISO20022 versions.
